**Our Kiosks** have been at Airports, Train and Bus Stations, Hotels, Casinos and Attractions for over 25 years.

**Our Clients** include Hotels, Bed and Breakfasts, Restaurants and Attractions. Many of our clients have been with us for decades.

This is your opportunity to participate in our success and to take our unique and exclusive **iscreenworld©** Kiosk Technology to the next level.

**The Opportunity** is very simple. You are granted a large exclusive Geographic Territory (+450,000 populations). We will assist you in finding deployment locations. You and your team will sell advertising with our 100% thorough sales training program.

Over the past five years we have developed one- of-a-kind touch interactive software (copyright #1071251). It is a turn key media centre for information. The traveller simply touches the screen to find a menu over the top of the blow up information ad with the options of touching the video button or map button regarding hotels, attractions, etc. A telephone attached to the Kiosk links the consumer to the business they are interested in for reservations, more information, discount coupons or other promotional opportunities. Those businesses are our advertisers.

**The Founders:** Bill Marshall, President of **iscreenworld©**, conceived of the **iscreen©** concept after having been in the travel information business for over 25 years. He had over 100 static versions of the current kiosks placed all over North America.

**On-going Support and Training:**

- All programming and updates by Head Office **iscreenworld©**

**iscreen WORLD**®

### Kiosk Warranty and Equipment Maintenance Contracts

- Technology Development
- Customer Support
- Full Mentoring and Training program
- In Field Training
- Full Professional Graphics and Design
- Advertiser Lead Distribution
- Database Maintenance
- Management and Sales Reports
- Trade Show and National Advertiser Support

**Your Background:** You are a go getter, anxious to build a sustainable long term business. As a hand on manager, a background in sales, broadcast or the hospitality industry is preferable. The ability to recruit and manage a hardworking and effective sales team is mandatory. This industry rewards hard work with SALES=PROFITS

**The Investment:** Depending on the size of kiosk, the investment ranges from \$11,495 to \$15,995 inclusive. Also, depending on your deployment the revenues will vary from a low of \$32,000 to a high of \$75,000 per kiosk. The copyrighted software is simple to use cut and paste and fill in the blanks. The market for deployment is varied and can be unique to your area; anywhere there are a large amount of people looking for information. Digital Kiosks are uniquely suited for placement in Ferry Terminals, Train Stations, Bus stations, Airports, large marinas, Shopping Centers and at Tourist Offices.

**The Technology:** Copyright technology ensures direct competition will always be low for your business. Our kiosks are durable steel which include infrared tempered glass platform construction that is almost indestructible.

### Each iscreenworld© Kiosk Includes:

- Highest commercial quality available 46" NEC LED Screen with infra red tempered glass overlay
- State of the art CPU driver and accessories built into the kiosk unit
- Database and software support from Head Office
- Real Time updates and programming ability
- **iscreenworld©** copyright software complete suite

We are here 24/7 to support you in sales and technical support. We believe with 5 kiosks a small company can produce well over \$250,000. This is based on USD and in North America it may vary in different countries.
